## Specifications

Semi-automatic

.50 caliber

10-round magazine

Variable-power day optic sight

Short recoil design

35 pounds (combat ready)

**Overall length:** 57 inches

**Barrel length:** 29 inches

The M107 Semi-Automatic Long Range Sniper Rifle is an anti-materiel/counter sniper, semi-automatic, direct-line-of-sight weapon system. It fires .50 caliber ammunition precisely and rapidly out to 2,000 meters. It leverages a short recoil design, variable-power day optic sight, and a 10-round detachable box magazine.

The M107 weighs 35 pounds (combat ready) and includes folding front and rear sights, fluted match grade barrel, dual-chamber detachable muzzle brake, detachable carrying handle, rubber recoil pad, rear grips, and a MIL-STD-1913 rail.

Accessories include hard and soft cases, detachable folding bipod, detachable sling, extra 10-round magazines, cleaning/maintenance equipment, and manuals.
